Die 16 mm Jalousie - schmal und filigran

Die 16 mm Jalousien bestechen durch die schmalen Lamellenbänder, von nur 16 mm Breite. Gerade für kleine Fenster, sehen diese optisch wunderschön aus.

Nebenbei bieten diese, wie alle Jalousien einen entscheidenden Vorteil. Durch das Wenden der Lamellen lässt sich das Licht lenken und variieren. Auch kann man die Lamellen so stellen, dass man heraussehen kann aber niemand kann hineinsehen. Mit Jalousien haben Sie den absoluten Sonnenschutz-Klassiker an Ihrem Fenster.
